

GTC COIN

'The First Coin in the World Convertible into Real Company Shares'

WHITE PAPER

1. Introduction

Genetic Trainer® Coin (GTC) emerges as a transformative force in an era marked by rapid advancements in biotechnology and financial innovation. GTC is designed to redefine how communities and investors engage with biotechnology companies.

1 GTC = 1 STOCK SHARE

By offering the unprecedented ability to invest directly into a company and its currency simultaneously, it bridges the gap between groundbreaking science and financial accessibility. With patented products targeting multi-trillion-dollar markets like fitness, healthcare, education, and insurance, GTC represents a convergence of scientific ingenuity and economic empowerment.

2. Key Innovations in Multi-Trillion Dollar Markets

Fitness: Genetic-based personalised training and diet plans.

Healthcare: Disease prevention and genomic solutions for chronic diseases (diabetes, cancer, heart, Alzheimer's)

Education: Genetic IQ analysing and DNA-based scientific learning models to optimise cognitive development.

Insurance: Using DNA-based personal risk assessment, creating fairer policy payout structures

7. The Genesis of Genetic Trainer® Coin & Market opportunity

The concept behind GTC is rooted in recognizing the untapped potential of integrating health technology with financial systems. Genetic Trainer Inc., the parent company of GTC, has long envisioned a future where community members and investors are key stakeholders in technological breakthroughs. This vision materialized with the creation of the first coin convertible into real company shares, providing an entirely new paradigm for investment and engagement.

8. GTC serves as a gateway for individuals to:

- ✓ Participate in the growth and success of Genetic Trainer Inc.
- ✓ Hold a tangible, blockchain-backed asset
- ✓ Invest with minimal capital and expertise
- ✓ Monitor investments via secure and transparent transactions
- ✓ Convert coins into real company shares

9. Community Engagement

GTC fosters a hybrid community of users and investors. By providing access to cutting-edge health tools and blockchain-based equity, community members become stakeholders in the company’s mission, value creation, and success

'The First Coin in the World Convertible into Real Company Shares'

"This model empowers collective progress and democratizes access to innovative health technologies."

10. Blockchain Security Features

- ✓ All smart contracts audited
- ✓ Immutable & transparent on-chain data
- ✓ Metamask / TrustWallet compatible
- ✓ Buyback & staking are fully traceable

11. Tokenomics Overview

- Total Supply: 10,000,000,000 GTC
- Minimum Stake Period: 1 Year (for free services)
- Dividend Access: 2-Year stake
- Equity Conversion: 3 Years stake = Share Conversion
- Buyback Rate: 20 % of yearly profit

12. Dividend and Buyback Mechanism

In addition to convertibility into real shares, GTC provides recurring value through two key mechanisms:

12.1 Annual Dividends

Token holders who stake or hold GTC will receive a share of Genetic Trainer Inc.'s annual net profits. This brings passive income to GTC investors and fosters long-term loyalty.

12.2 Strategic Buyback Program

Each year, 20% of the company's profits will be used to buy GTC from the market. Instead of burning tokens, the company retains them, lowering the circulating supply and supporting price stability. This creates a **deflationary economic model** that reflects both scarcity and growth.

13. The Intersection of Biotechnology and Financial Innovation

GTC is more than just a coin; It is a financial instrument designed to democratize access to biotechnology.

The coin benefits from Genetic Trainer Inc.'s proprietary technologies and services, ensuring that stakeholders are directly connected to the company's success by providing the following advantages

13.1 Transparency

Blockchain technology ensures that all transactions involving GTC are secure and transparent. Investors can trace their investments and monitor their performance, fostering trust and accountability.

13.2 Liquidity

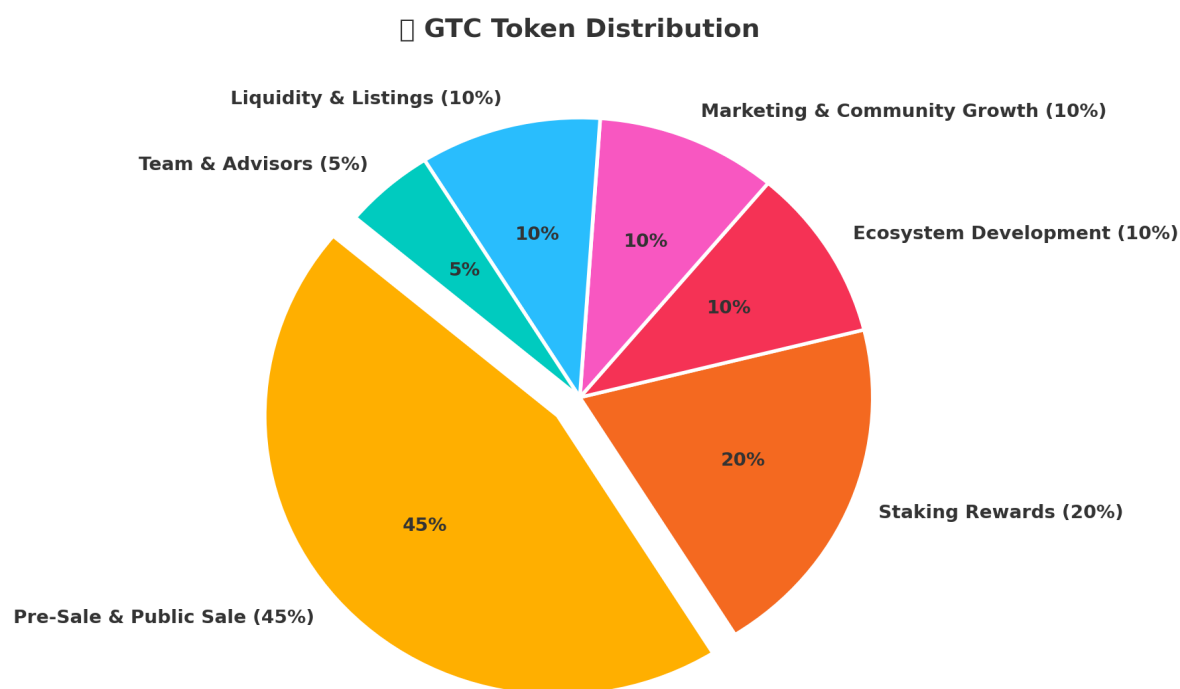

The coin's convertibility into real company shares provides unparalleled liquidity. Investors can choose to retain their coins as assets or convert them into shares, depending on their financial goals and market conditions.

14. Token Distribution

The GTC token supply is allocated as follows to ensure the project's sustainable growth, community rewards, and operational scalability.
